

Commercial Projects & Applications

12.0mm BGC DURAFORM™ FIBRE CEMENT SHEETS

Braxton Apartments introduces Perth's first rooftop residential leisure centre for owners and occupants.

The 7 level concrete construction contains 19 luxury apartments with the rooftop reserved for leisure activities comprising BBQ facilities, swimming pool, heated jacuzzi and a tanning deck all within view of the delightful Swan River.

Floor construction between levels utilised the 'Ultrafloor' system of pre cast beams inlaid with 12.0mm BGC Duraform™ fibre cement sheets to create floor panels that accepted the concrete pour. Ultrafloor has the ability to significantly cut construction time and reduce waste. The system also provides a clear underfloor for the installation of plumbing and electrical services

Underside of 'Ultrafloor' System showing essential services can be easily accessed through the Duraform™ sheets.

Project Details

• LOCATION

Bennett St. Perth W.A.

• BUILDER

Broad Construction Services Pty Ltd

Fibre Cement - A Product of Advanced Technology
