

# BRIKMAKERS DEVELOP WA'S MOST CONTEMPORARY PAVING PRODUCT

## Introducing the new Granite Collection

Brikmakers have worked closely with leading architects and designers to develop WA's most contemporary paving product. Our amazing new Granite Collection combines the colour and textural variation of natural stone with the engineered strength specifically designed for driveways and walkways.

Perhaps what's most remarkable about the Granite Collection is that, despite its premium, local materials and designer-quality appearance, the Granite Collection is surprisingly competitively priced.

This stunning new collection is available in seven, stylish colours in the Vistapave 190x190mm format and in 50mm and 60mm thickness for maximum versatility.

River Shingle

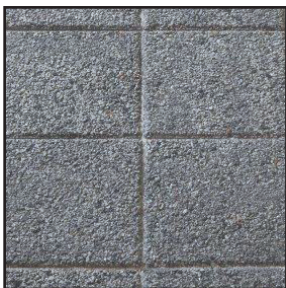

Chert

Tundra

Pebble Beach

Storm Cloud

Arctic

Sea Mist
